Composite Gate Tops

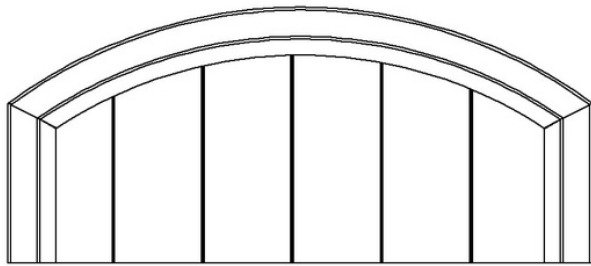

Flat Top Gates

A clean, contemporary design offering a minimalist look that suits modern properties and urban settings. Ideal for homeowners seeking simplicity, symmetry, and a no-fuss aesthetic.

Best for: Minimalist designs, pedestrian entrances, and properties with modern architecture.

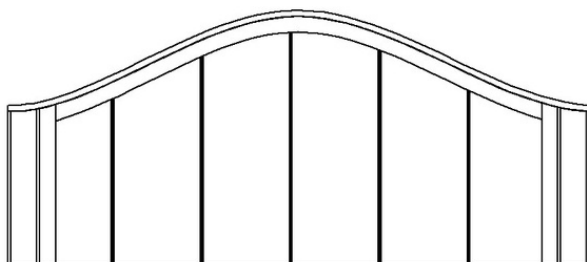

Arch Top Gates

A gentle curved profile adds elegance and visual interest, softening the lines of the gate. Arch top designs can be subtle or pronounced depending on the opening size and customer preference.

Best for: Traditional homes, landscaped gardens, and properties looking to add character.

Swan Neck Top Gates

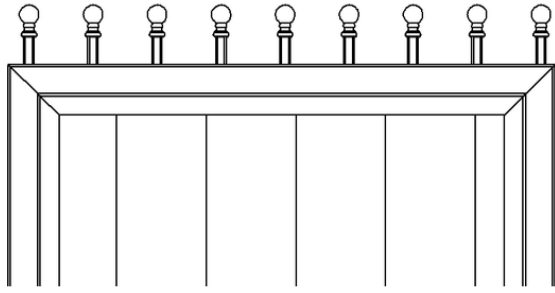

A signature feature gate with one side higher than the other, creating a sweeping, asymmetrical curve that draws the eye. Swan neck gates are both decorative and imposing.

Best for: Period properties, large entrances, or when a bold design element is needed.

While illustrated on single gates, all top designs featured can be replicated across wider double gates or $\frac{3}{4}$ split gate setups, allowing full design flexibility for any entrance size.

Composite Gate Top Extras

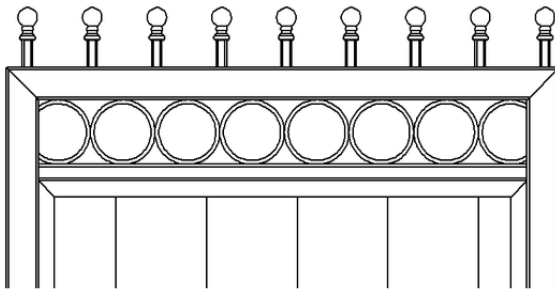

Gates with Railheads

Classic and secure, railheads (also known as finials) add a traditional touch to any gate. Available in a range of styles from spiked to ornate, they enhance both visual appeal and security by making the gate more difficult to climb.

Best for: Period properties, added security, and those wanting a timeless wrought iron look.

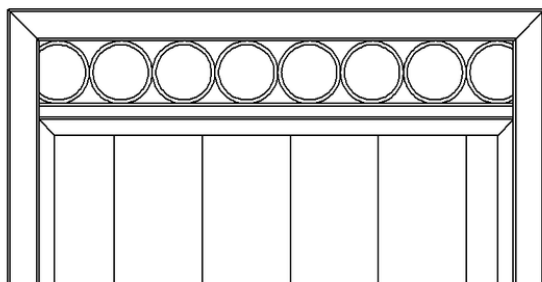

Gates with Railheads & Rings

Combining vertical railheads with decorative mid-rail rings, this style balances elegance with strength. The rings add a layered, ornamental detail that breaks up the vertical bars, creating a more traditional and eye-catching design.

Best for: Heritage homes, garden entrances, and customers seeking ornate detailing.

Gates with Rings Only

Featuring horizontal rows of decorative rings, this design softens the gate's appearance without adding pointed features. It's a subtler take on traditional styling, ideal for those who want visual interest without the formality of finials.

Best for: Garden gates, terrace railings, and properties with softer architectural lines.

While illustrated on single gates, all top designs featured can be replicated across wider double gates or $\frac{3}{4}$ split gate setups, allowing full design flexibility for any entrance size.

Locking Systems

We only use high-quality, tried-and-tested locking systems that are proven to perform in real-world conditions.

Locinox Keyed Lock – Modern Handle

A sleek aluminium handle with a durable painted finish, paired with a reliable keyed lock mechanism. Designed for a clean, contemporary look that complements modern gates while maintaining excellent security and durability.

Note: This lock can be powder coated to match the gate frame for a seamless finish.

Locinox Keyed Lock – Decorative Handle

Combines proven Locinox security with a more ornate aluminium handle. The traditional shape adds character to the gate while retaining the strength and performance Locinox is known for.

Note: This lock can be powder coated to match the gate frame for a seamless finish.

Borg Keypad Lock

A fully mechanical push-button code lock, removing the need for keys while maintaining solid access control. Ideal for shared access points or when convenience and security must go hand-in-hand.

Note: This lock is only supplied in Black with Silver Buttons

Decorative Features

Choose from a range of railheads, baskets, collars, and rings to enhance your gate or railing.

RH1

RH2

RH5

RH6A

RH7

RH18

Rail Heads

Rail heads, or finials, crown our gates & railings and instantly define the personality.

Choose a spear point for a bold, security-first statement, a fleur-de-lis for formal heritage charm, a smooth ball top for a softer residential feel.

Twisted Basket

Square Collar

Round Collar

Collars & Baskets

Forged collars slide over the bar to create shadow lines and extra detail, while twisted baskets introduce sculptural and help break up long verticals.

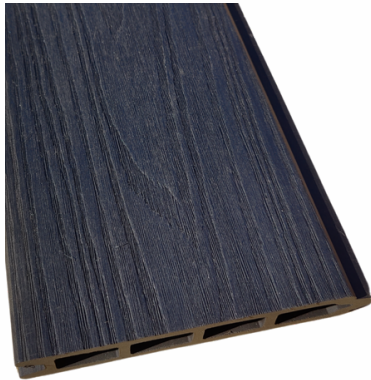

Plain Ring

Fish Tail Ring

Premium Composite Gate & Fence Boards

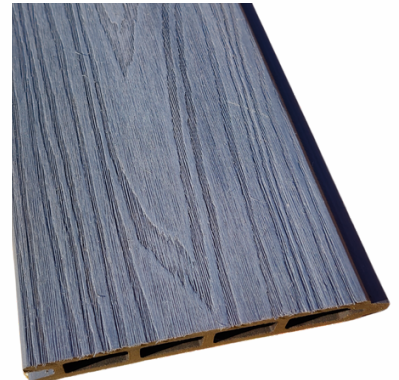

Available in 7 colours. Each board features complementary shades that create a more natural and authentic appearance.

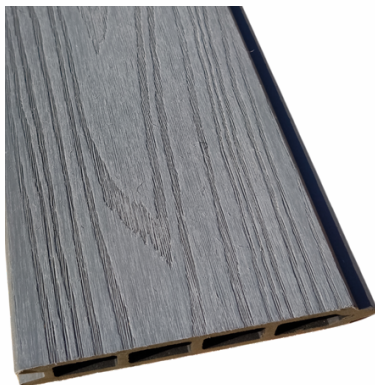

Charcoal Black

Anthracite Grey

Stone Grey

Ash Grey

Teak

Walnut

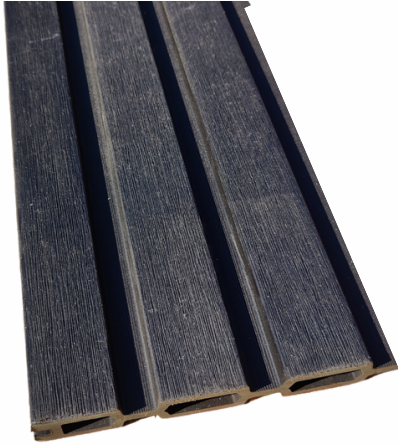

Dark Oak

Our composite boards are made from a high performance blend of wood fibres, plastics, and bonding agents.

Each board features a woodgrain effect outer shell wrapped around a durable composite core, offering the look of timber with none of the maintenance.

CONTEMPORARY GATE & FENCE BOARDS

Available in 3 colours. Each board features complementary shades that create a more natural and authentic appearance.

Charcoal Black

Anthracite Grey

Teak

Made from the same durable composite core and wrapped outer as our premium boards, the contemporary range features a slatted Venetian-style design.

This modern profile adds a sleek, architectural look while maintaining low maintenance and long-term durability.
